

In partnership with Canadian universities, hospitals and research centres, we inform and excite Canada's youth about the wide variety of career options in medicine and the health care field. By connecting high school students to world-class researchers and clinicians in real life settings, we are helping to build our future health workforce.

We pivoted as necessary due to the pandemic and delivered these impactful events virtually for the first time. Using a new online platform, we engaged the students in a mix of new and previously successful strategies:

- Digital exhibit booths
- Keynote lecture
- Speed networking - one:one sessions to connect with other students
- 60-Minute interactive workshops
- "Health Pros Tell All" career panel Q&A

Due to the unforeseen circumstances, our Spring Discovery Day programs scheduled at Western University, Queen's University, Memorial University, University of Ottawa (English and French) and Hamilton Health Sciences were unable to proceed.

I really enjoyed listening to each of the panelists' careers and life stories. It helped me gain insight into what degree and career I may pursue in the future.

Student, BC Children's Hospital Research Institute Discovery Day

Discovery Days University of Alberta

Discovery Days began with a large dose of inspiration from world-class keynote speakers ...

The Dr. D. Lorne Tyrrell Keynote Lecture
University of Alberta – October 27th
2011 CMHF Laureate D. Lorne Tyrrell, OC MD PhD
Distinguished Professor

« L'Effet papillon »

Discovery Days University of Calgary University of Manitoba

Discovery Day was an exceptional opportunity to hear about the experiences of health professionals & to better understand the path in medicine I may ultimately take.

Student, University of Alberta Discovery Day

Thank you to our partners for investing in this important and growing initiative. Together, we are preparing today's youth to be our health leaders and researchers of tomorrow.

Discovery Days (top to bottom) Université Laval University Manitoba University Manitoba McGill University

Super informative and helpful towards exploring various careers in medicine. I enjoyed how much information was covered and how many options there are for different careers.
