WORKSHOP CATALOGUE

Code	Title	Description	AM	PM	Coordinator/Presenters (Department) and Location
A01	<i>Radiology -- Shining some light on the dark rooms of the hospital</i>	Join resident doctors and radiological technologists to learn about professions in Diagnostic Imaging. An overview of the specialty will be presented, followed by an interactive game to learn more about imaging		30	Ryan Smith (Diagnostic Radiology)
A02	<i>The Real Deal in Fake Healthcare Encounters</i>	Immerse yourself in the world of simulation in health care where we "make believe" we are in clinical encounters for student learning and professional assessment. Interactive and creative, you will learn how to design your own health care simulation scenario, watch a simulated patient encounter, try out some special effects make up, meet automated mannequin "patients" and other various simulated body parts used to practice medical skills. You'll get a VIP behind the scenes experience of how we make fake health encounters feel very real!	16	16	Karen Bassett Jacquie Thillaye Sheldon Payne The Centre for Collaborative Clinical Learning and Research
A03	<i>What Affects our Health?</i>	Join Canadian Medical Hall of Fame Laureate Noni MacDonald in a workshop on what health is. She will encompass her career over a 40 year span giving several examples of different work in health care and then on current work on MicroResearch and vaccines and vaccine acceptance . Has a " Bad news - fake news tycoon game to play followed by Q&A on presentation and on what areas health care interested in and why.	25		Noni MacDonald (Pediatrics – Infection Disease)
A04	<i>Destination Doctor: Exploring the Path to Medical School</i>	This presentation provides a concise yet comprehensive glimpse into medical school life. It covers the curriculum, skills acquired, reasons to choose medicine, and the path to medical school admission. I break down the medical school experience, from basic sciences to clinical skills, emphasizing critical thinking and communication skills development. As well, I will also be exploring the various motivations for a medical career, including patient impact, intellectual fulfillment, and career diversity. Finally, I will be outlining my journey to medical school, from prerequisites to applications, offering an objective roadmap for aspiring medical students.	20	20	Loukman Ghouti (Medicine)

A05	Post-Secondary Prep: Educational Pathways to Meaningful Careers in Healthcare	Are you interested in a rewarding career in healthcare but unsure where to start? In this session, you'll explore the various post-secondary programs that lead to in-demand healthcare careers. From nursing to diagnostic imaging, we'll break down the educational pathways, program options, and key skills needed for success after high school graduation. A great workshop for Med school hopefuls and those not sure about their next steps through post-secondary education.	30	30	Shane Arsenault Scott Carter (Recruitment @ Nova Scotia Health)
A06	Solid Organ Transplantation	We will have a presentation with an interactive discussion on solid organ transplantation. The students will then learn basic suturing and laparoscopic technique	10	10	Mark Walsh (Surgery)
A07	Surgical Skills Session	In this workshop you will have an opportunity to engage with second-year medical students and surgical residents to learn more about the field of surgery! This interactive workshop will be a hands-on learning skills session, where you will learn how to complete surgical techniques such as suturing and hand-tying.	15	15	Abigail Greek
