Find the last names of  
**local laureates**

**BEER**, Dr. Charles: With Dr. Noble, isolated vinblastine, a milestone in history of cancer chemotherapy; conducted research at UBC for 21 years.

**CYNADER**, Dr. Max: Recognized the importance of plasticity in the developing brain; Founding Director of the Brain Research Centre, now known as Djavad Mowafaghian Centre for Brain Health at UBC.

**EAVES**, Dr. Connie: A world authority on stem cells who also impacts bone marrow transplantation treatments for leukemia and breast cancer.

**FINLAY**, Dr. B. Brett: Extended our understanding of microbe-human interaction in both health and disease; works in the Michael Smith Laboratories at UBC; co-author of the provocative best-seller *Let Them Eat Dirt: Saving Your Child from An Oversanitized World*.

**HALL**, Dr. Judith: At the international forefront of genetics and pediatrics for more than four decades; specialized in the genetic factors that affect lack of children’s growth, including the mechanism of neural tube defects, the genetics of short stature and the genetics of connective tissue disorders such as arthrogyrosis, dwarfism, and monozygotic twins.

**HAYDEN**, Dr. Michael: Most cited author for research into mechanisms, prevention and treatment of Huntington’s disease; President of Global R&D and Chief Scientific Officer for TEVA Pharmaceuticals; Professor of Medical Genetics at UBC.

**HOGG**, Dr. James: An outstanding researcher, teacher, lecturer and colleague, Dr. Hogg has arguably had a greater influence on the medical community’s knowledge of COPD and asthma than any other individual worldwide.

**MONTANER**, Dr. Julio: A visionary physician and scientist whose work has directly contributed to stopping HIV and AIDS globally; Past President of the International AIDS Society; Director of UBC’s Centre for Excellence in HIV/AIDS.

**NOBLE**, Dr. Robert: With Dr. Beer, isolated vinblastine, a milestone in history of cancer chemotherapy; Director of Cancer Research and Professor of Physiology at UBC 1960-1975.

**SMITH**, Dr. Michael: Noble prize winner for developing technique to manipulate DNA sequence of any gene; Founding Director of the Genome Sequencing Center at the BC Cancer Research Agency.
